

## CUSTOMIZED PORTABLE PLANTS

### APPLICATIONS AND FEATURES

- Portable / Modular Plants with Jaw / Cone / HSI / VSI / Screens
- Custom design using Sepro OEM equipment or customer specified components
- Designed to minimize setup / teardown time and improve access for maintenance and safety

**Carminex**, a division of Sepro Mineral Systems, designs and fabricates portable crushing plants which can utilize Sepro equipment, other OEM equipment, or customer supplied crushing and screening equipment. Plant design revolves around creating plants that are safe, easy to maintain and easy to configure for over the road towing with a minimum of disassembly required.

Sepro and Carminex have a team of expert engineers to build solutions for the quarrying and aggregate needs of clients. All custom projects begin with an idea and ask the question, "is it possible?" Our engineering department believes in exhausting all avenues to create an efficient piece of equipment to improve productivity both on and away from the sites of our clients.

# CUSTOMIZED PORTABLE PLANTS

## PORTABLE RIP RAP PLANTS

- Extreme duty plants intended for the production of coarse products
- Direct feed by wheel loader or excavator
- Hopper is constructed of heavy plate and well lined
- Standard design utilizes a SEPRO 64" x 24' HR Grizzly Feeder
- Electric and diesel powered versions available

## PORTABLE IMPACTOR (Concrete and Asphalt Recycling)

- Versatile plant designs for the difficult duty of crushing and screening recycled construction materials
- On board magnets for separating rebar and other steel waste from products
- Rapid set up and tear down allow for frequent moves between yards
- Closed circuit plants with screens and feeders allow for a complete plant on a single road portable chassis
- Electric and diesel powered versions available

## PORTABLE IMPACTOR (Primary Crushing)

- Heavy duty primary impactor plants which can be used to crush limestone in large or small quarry operations
- Available designs can be fed with loaders or designed for direct feed with a rock truck
- Units can be supplied with optional hydraulic rock breaker

## PORTABLE PRIMARY JAW PLANTS

- Carminex has designed some of the largest portable jaw units in service today, having mounted units up to the 4860 size range
- Units can be fed with loader or rock truck
- Large units are designed with removable feeders for road transport

## PORTABLE CONE CRUSHING PLANTS

- Designed to adapt to a variety of configurations
- Plant options include simple rear discharge, IOC (feed and discharge conveyor), front discharge and our latest swing conveyor discharge
- Carminex has extensive experience mounting Metso™, Sandvik™, Telsmith™ cone crushers in addition to Sepro products

## PORTABLE SCREEN PLANTS

- Wide variety of plant designs and configurations are available mounting both incline screens and horizontal screens
- Feeder screen plants, twin screen, single incline or horizontal plants with or without feed conveyors are available
